

Find Grandma Vertical Slice

Sherry (Pin Hsuan Wang)

Core Concept

Genre Choice

The genre would be 2d platformer with puzzle-solving mechanics in level progression.

Unlike traditional 2D platformers that focus mainly on movement and timing (such as jumping and avoiding enemies), this game emphasizes tool-based puzzle solving and logical sequencing.

Players will:

- Explore the environment
- Use tools to interact with the environment
- Solve puzzles that unlock paths forward

The complexity comes from combining:

- Platforming (movement, timing)
- Puzzle logic (order, interaction, transformation)

Elevator Pitch

A fantasy 2D puzzle-platformer where players take on the role of a Little Red Riding Hood, using tools and logic to overcome obstacles, solve environmental puzzles, and escape a mysterious forest.

Gameplay Loop

1. Explore the level and encounter obstacles or blocked paths
2. Discover or receive a tool (e.g., scissors)
3. Identify a puzzle that requires the tool
4. Use tool interact with objects (drag, click)
5. Solve the puzzle through correct sequence or logic
6. The environment changes (branches removed)
7. Progress further into the level
8. Repeat with increasing complexity

Puzzle Example:

Scissors → cut objects to go forward

(Future extension) Fire → melt ice to get water

(Future extension) Water → grow plants to create path

Vertical Slice Mechanics

1. Movement:
 - i. Player uses A / D keys to move left and right
2. Interaction

Player presses Space to interact with:

 - i. Objects
 - ii. Items
 - iii. NPCs
3. Puzzle

Pressing Space at a puzzle point opens the inventory

 - i. The cursor is activated for interaction
 - ii. Player can:
 1. Click
 2. Drag
 3. Select items
 - iii. Complete the puzzle through interact with world

Vertical Slice Content

Vertical Slice the content will have 1 NPC, 1 Item, 1 Puzzle

NPC and player are trapped in a cave, blocked by trees' branches

The NPC provides the player with a pair of scissors

The puzzle requires the scissors to access and activate

The player uses the scissors to interact with the puzzle, player use scissor to cut the branches in correct order to leave.

Excluded Features

Use the tool can change the item's property such as use fire the melt the ice into water to expand the possibility.

Aesthetics

like a fairy tale, hand draw

Visual elements:

- Soft color palette with darker tones in deeper forest areas
- Environmental storytelling (twisted trees, fog, glowing objects)

Audio design:

- Calm background music in early stages
- Slightly tense sound effects in dangerous puzzle areas
- Interaction sounds (cutting, clicking) to give feedback

Plan of Execution

Resources

Background:

[Forest and Trees Free Pixel Backgrounds - CraftPix.net](https://craftpix.net/freebies/free-pixel-backgrounds-forest-trees/)

Characters:

[Free Fantasy Chibi Female Sprites Pixel Art - CraftPix.net](https://craftpix.net/freebies/free-fantasy-chibi-female-sprites-pixel-art/)

Property:

<https://assetstore.unity.com/packages/2d/environments/pixel-art-platformer-village-props-cainos-166114>

Unity tool choice

I chose Tilemap to create the map because it is easier to manage both the level layout and collision. I use Animator to control the character's movement animations, including different states and transitions. I also use ScriptableObject to organize item status and puzzle data. For example, if the player fails a puzzle, the NPC can give the player a hint during a conversation..

VFX system

When go into snow area, the snow flake drops.

Break-down
